National Academy of Sciences Building
2101 Constitution Ave NW | Washington, DC 20418

SPONSOR PROSPECTUS

NATIONAL ACADEMY
OF CONSTRUCTION

AMERICAN COLLEGE
of CONSTRUCTION LAWYERS

NATIONAL ACADEMY
OF ENGINEERING®

The construction industry stands at the threshold of profound transformation. Advances in technology, evolving workforce expectations, changing legal frameworks, infrastructure demands, sustainability priorities, and global economic forces are reshaping how the world's most complex projects will be conceived, designed, and delivered over the next quarter century.

Project 2050: Exploring the Future of the Construction Industry brings together many of the industry's most respected voices to examine these emerging challenges and opportunities before they become tomorrow's realities.

Presented by the National Academy of Construction (NAC), the American College of Construction Lawyers (ACCL), and the National Academy of Engineering (NAE), this prestigious symposium convenes leaders from construction, engineering, law, academia, and industry to share independent perspectives, challenge conventional thinking, and explore the innovations that will define the future of the built environment.

Through dynamic presentations, panel discussions, and collaborative dialogue, participants will examine topics including workforce transformation, artificial intelligence, advanced project delivery, infrastructure resilience, sustainability, legal and regulatory evolution, emerging technologies, and the leadership required to navigate an increasingly complex industry.

More than a conference, Project 2050 serves as a catalyst for meaningful industry dialogue. The ideas, insights, and recommendations generated throughout the symposium will be documented and published in the ACCL Journal, extending the conversation beyond the event itself and creating a lasting resource for construction professionals, policymakers, educators, and future industry leaders.

By partnering with Project 2050, sponsors demonstrate their commitment to advancing the construction industry through innovation, collaboration, and thought leadership while gaining visibility alongside the organizations and individuals helping shape what comes next.

Together, we are not simply anticipating the future of construction; we are helping define it.

What's In It For You?

Brand Visibility: Reach 300+ industry leaders and decision-makers.

Thought Leadership: Associate your organization with innovation and future thinking.

Relationship Building: Networking sessions, receptions, and one-on-one conversations.
